MDS Influenza Vaccine Coding (continued)

This algorithm is intended to help MDS staff code influenza vaccinations accurately.

Influenza Vaccine received in the facility

1. Code O0250A, 1, yes. Proceed to O0250B, Date influenza vaccine received.
2. Enter date influenza vaccine received (O0250B).
3. Continue to code these items until the new influenza season begins.

Influenza Vaccine not received in the facility

1. Code O0250A, 0, no. Proceed to O0250C, If influenza vaccine not received, state reason.
2. Code O0250C with the reason vaccine was not received.
3. Continue to code this item until the new influenza season begins, unless;
4. If vaccine was not offered or the answer is unknown. Vaccine should be offered and subsequent MDS assessments should be coded accordingly until the new influenza season begins.

This Tip Sheet contains information from the MDS 3.0 RAI Manual accessed in October 2019. The content does not take the place of, and is not at all inclusive of the comprehensive information and instructions provided by the MDS 3.0 RAI Manual. Any updates to the RAI manual will supersede this content. Reader should utilize the most current manual at all times.
