

Health Quality Innovation Network

# Sepsis Affinity Group

September 2, 2021

# Logistics – Zoom Meeting

To ask questions, click on the **Chat** icon.

**Raise your hand** if you want to verbally ask a question by clicking on the **Reactions** icon and then clicking on “Raise Hand”.

You may adjust your audio by clicking the caret (^) next to the **Unmute** icon.

A recording and slides from today’s session will be shared after the call.

# Today's Speaker

**Deb Smith, MLT (ASCP),  
BSN, CIC, CPHQ**

**Rachel Schade, BS**

# Session 3: Audit, Measure, & Feedback for Success

# Recap Session 1: Early Screening Strategies

**1** Quality Improvement process

**2** Building you TEAM

**3** Setting your goal

**4** Identifying patients at risk for Sepsis

**5** Identifying Sepsis in the ED

**6** Identifying Sepsis in the ICU and floors

**7** Follow up and homework

# Recap Session 2: Implementation of Sepsis Bundles

- 1** Bundle Basics
- 2** Raising Awareness
- 3** Addressing Barriers
- 4** Success Factors/Facilitators
- 5** Keeping Things in Perspective
- 6** Questions

# Session 3 Agenda: Audit Measure and Feedback for Success

**1**

**Discuss Auditing strategies for Sepsis**

**2**

**Understand the HQIC Measures for Sepsis**

**3**

**Learn the importance of providing Feedback**

# Gap Analysis Starting Point

## Hospital Sepsis Gap Analysis

Element	Yes	No	N/A	Unsure	Comments
<b>Leadership Support</b>					
1. Do you have a sepsis program? If yes, please describe in comments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2. Does your sepsis program have leadership support, i.e. administrator, medical director, medical staff, clinical staff?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
3. Is your medical staff actively involved in sepsis prevention?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
<b>Committees</b>					
4. Do you report on sepsis at?					
a. Quality Committee	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b. Infection Control Committee	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
5. Do you share infection or sepsis data with staff? If yes, list type of data under comments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
6. Do you share information with patients and families? List how under comments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
<b>Education</b>					
7. Do you have a sepsis early recognition training program?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
a. If No, do you need assistance setting up a training program?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8. Does hospital staff have an annual competency for sepsis?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
9. Do you utilize skills days for nursing assistant sepsis training?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
10. What are the tools you use to train staff, i.e., INTERACT, Seeing Sepsis 100, or other? List under comments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
a. Do you have sepsis education materials for staff?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b. Do you have sepsis education materials for patients and families?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
<b>Early Identification of Sepsis &amp; Infection Risk</b>					
11. Does your admission assessment include an infection and sepsis risk assessment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
12. Do you audit the admission nursing assessment to ensure it is completed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Element	Yes	No	N/A	Unsure	Comments
13. If infection/sepsis risk is triggered on assessment, do you care plan the level of infection/sepsis risk?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
14. Does your care planning include interventions appropriate to the level of risk i.e. high-risk rounding, more frequent monitoring of vital signs and mental status?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
15. Do you audit the care plan and implementation of interventions for those identified at risk?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
16. Are bundles (Hour 1, etc.) used to guide front line team in the care of a patient with sepsis?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
<b>Patient and Family Education</b>					
17. Do you provide sepsis education to patients and families?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
18. Do you provide any material (CDC, HQI Patient and Family Guide) to families, board members, community? If so, please list under comments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
19. How do you involve your patient and/or family council in sepsis education? Please list under comments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

# Gap Analysis Results = 20 responses (to date)

Report on sepsis at Quality Committee?

Report on sepsis at Infection Control Committee?

Share sepsis data with staff?

Share sepsis information with patients and families?

# Action Plan cont.

## Action Plan

Specific Actions and Interventions	Baseline Rate	Goal Rate	Projected Completion Date	Responsible Parties	Ongoing Monitoring	Comments and Resources
[enter start date here] Analyze sepsis mortality rates and determine your goal						
[enter start date here] Identify gaps in current practice						<ul style="list-style-type: none"> <li>• <a href="#">Hospital Sepsis Gap Analysis</a></li> <li>• <a href="#">Fishbone Diagram</a></li> <li>• <a href="#">Sepsis Road Map</a></li> <li>• <a href="#">Hospital Toolkit for Adult Sepsis Surveillance</a></li> </ul>
[enter start date here] Create your process map						<ul style="list-style-type: none"> <li>• <a href="#">Seeing Sepsis</a></li> <li>• <a href="#">It's About TIME</a></li> <li>• <a href="#">In Situ Simulation Sepsis Telehealth Toolkit</a></li> </ul>
[enter start date here] Introduce early detection education and guidance						<ul style="list-style-type: none"> <li>• <a href="#">Sepsis Simulation Tool: ED</a></li> <li>• <a href="#">Sepsis Simulation Tool: Inpatient</a></li> </ul>
[enter start date here] Practice the approach						<ul style="list-style-type: none"> <li>• <a href="#">Emergency Department and General Floor Sepsis Algorithm</a></li> <li>• <a href="#">CODE: Sepsis Order Sub Set</a></li> </ul>
[enter start date here] Provide tools						

# Data Collection for Improvement

- Tracking and monthly review of sepsis incidence and mortality rates and process measure.
- Monthly review of compliance with routine sepsis screening and rapid treatment according to Surviving Sepsis Campaign 3 and 6-hour bundles,
  - Include documentation of time zero and use of a sepsis order set
- Routine analysis of all sepsis cases to identify opportunities for improvement,
  - Include a process to share all findings with staff in a real time.

# Data Collection Elements

- **Patient Log**
  - Define how to identify all patients that receive the bundles
  - Real time data collection is optimal—then used as checklist to ensure patient receives all appropriate interventions
- **Outcome**
  - Mortality (ICU and Hosp)
  - Hosp LOS
  - Cost per case (total and direct)
- **Process**
  - Core Measures
  - Data elements that measure implementation of 3 hour and 6 hour bundle

# How You Collect Data Impacts Use

How is Data Used	Prospective	Concurrent	Retrospective
Anticipatory review of patient record (can impact current care)	Yes	No	No
Data abstracted in real time or within 24 hours		Yes	No
Serves as a prompt to execute bundle or the next phase of the bundle	Yes	Yes	No
Recommended for new improvement teams		Yes	No
Recommended for advanced improvement teams or those that have demonstrated success with process measures	Yes		Yes

Surviving Sepsis Campaign, Society of Critical Care Medicine, website accessed 1/26/2020

# Electronic Case Review

**Patient  
demographics**

**Comorbidities  
from problem  
list or ICD-10  
codes**

**Patient  
location**

**Additional  
microbiology  
testing or  
diagnostic  
results**

**Surgical or  
procedural  
history**

**Presence of an  
indwelling  
device (IUC,  
CVL)**

**Additional patient  
outcomes: ICU  
admit, LOS,  
Discharge  
destination (LTC,  
home rehab)**

**Billing Cost**

# Electronic Case Review cont'd

**Microbiology  
results:  
Blood/Fungal  
culture**

**Medication  
administration  
records:  
Antimicrobial,  
vasopressor**

**Laboratory Data:  
Serum lactate,  
creatinine,  
platelet, etc.**

**ICD-10 codes:  
ESRD (N18.3),  
Ventilation  
(5A1935Z,  
5A1945Z,  
5A1955Z)**

**CPT Codes**

**Patient outcome:  
death/transfer  
to hospice/  
comfort care,  
discharge/  
transfer to acute  
care**

# Manual Case Review

## Appendix E: Adult Bacteremia/Fungemia Shock Event (BSE) Manual Case Report Template

(\* = optional)

Hospital ID: \_\_\_\_\_ Event #: \_\_\_\_\_  
 Patient ID: \_\_\_\_\_ Social Security #: \_\_\_\_\_  
 Secondary ID: \_\_\_\_\_ Medicare #: \_\_\_\_\_  
 Patient Name, Last: \_\_\_\_\_ First: \_\_\_\_\_ Middle: \_\_\_\_\_  
 Gender: F M Other \_\_\_\_\_ Date of Birth: \_\_\_\_\_  
 Ethnicity (Specify): \_\_\_\_\_ Race (Specify): \_\_\_\_\_  
 Date Admitted to Hospital: \_\_\_\_\_  
 Sepsis Onset Date: \_\_\_\_\_ \*Location at Onset Date: \_\_\_\_\_

### Event Type:

- Community-Onset (onset date on hospital day 2 or earlier, when date of admission is hospital day 1)  
 Hospital-Onset (onset date on hospital day 3 or later, when date of admission is hospital day 1)

### Event Details (must meet Criteria #1 AND #2)

#### CRITERIA #1: Presumed Infection

- Blood or Fungal culture with non-commensal pathogen identified

AND

#### CRITERIA #2: Organ Dysfunction (in 2 days of blood culture)

- Initiation of a new vasopressor infusion\*

\*Vasopressor must not have been administered in prior calendar day.

Qualifying vasopressors include: norepinephrine, dopamine, epinephrine, phenylephrine, vasopressin.

Single vasopressor doses or those given in an operating room or other procedural area do not qualify.

Died: Yes  No  \*Sepsis Contributed to Death: Yes  No

Discharge or Death Date: \_\_\_\_\_

\*Discharge Location:

- Private residence  Long-term care/Skilled nursing facility (SNF)  
 Acute care hospital  Homeless  
 Long-term acute care hospital (LTACH)  Incarcerated  
 Hospice  Other

\*Pathogens Identified: Yes  No  \*If Yes, option to specify on next pages

 Discharging Physician: \_\_\_\_\_ MFR: \_\_\_\_\_ Acct. #: \_\_\_\_\_  
 Admit Date: \_\_\_\_\_ Discharge Date: \_\_\_\_\_

#### Sepsis Criteria

Sepsis Criteria: (all three of which must be met within 6 hours of each other)

- Documentation of a suspected source of clinical infection. There may be reference to "possible infection from x", "suspect infection from x", or similar reference in progress notes, consult notes, or similar physician/APN/PA documentation. Nursing documentation referencing an infection, suspected infection, or current treatment of an infection is acceptable. Exclude documentation of viral or fungal infections.  
 Yes  No / UTD Date: \_\_\_\_\_ Time: \_\_\_\_\_  
 Infection: \_\_\_\_\_ Source of Documentation: \_\_\_\_\_
- Two or more manifestations of systemic infection according to the Systemic Inflammatory Response Syndrome (SIRS) criteria, which are:  
 Temperature > 38.3 C or < 36.0 C Date: \_\_\_\_\_ Time: \_\_\_\_\_ Result: \_\_\_\_\_  
 Heart rate (pulse) > 90 Date: \_\_\_\_\_ Time: \_\_\_\_\_ Result: \_\_\_\_\_  
 Respiration > 20 per minute Date: \_\_\_\_\_ Time: \_\_\_\_\_ Result: \_\_\_\_\_  
 White blood cell count > 12,000 or < 4,000 or > 10% bands Date: \_\_\_\_\_ Time: \_\_\_\_\_ Result: \_\_\_\_\_
- Organ dysfunction, evidenced by any one of the following:  
 SBP < 90, or MAP < 65 Date: \_\_\_\_\_ Draw Result: \_\_\_\_\_ Result: \_\_\_\_\_  
 Doc of acute resp failure AND a new need for invasive or non-invasive mech vent. Date: \_\_\_\_\_ Draw Result: \_\_\_\_\_ Result: \_\_\_\_\_  
 Creatinine > 2.0, or urine output < 0.5 mL/kg/hour for 2 hours Date: \_\_\_\_\_ Draw Result: \_\_\_\_\_ Result: \_\_\_\_\_  
 Bilirubin > 2 mg/dL (34.2 mmol/L) Date: \_\_\_\_\_ Draw Result: \_\_\_\_\_ Result: \_\_\_\_\_  
 INR > 1.5 or aPTT > 40 sec Date: \_\_\_\_\_ Draw Result: \_\_\_\_\_ Result: \_\_\_\_\_  
 Lactate > 2 mmol/L (18.0 mg/dL) Date: \_\_\_\_\_ Draw Result: \_\_\_\_\_ Result: \_\_\_\_\_

#### Severe Sepsis

- Discharge Time: \_\_\_\_\_
- Discharge Disposition:  
 1 - Home / Self care  
 2 - Hospice - Home  
 3 - Hospice - Health Care Facility  
 4 - Acute Care Facility  
 5 - Other Health Care Facility  
 6 - Expired  
 7 - AMA  
 8 - Not Documented / UTD
- Transfer From Another Hospital or ASC:  
 Yes  No UTD Time: \_\_\_\_\_ UTD
- Severe Sepsis Present:  
 Yes  No Date: \_\_\_\_\_ UTD Time: \_\_\_\_\_ UTD
- Severe Sepsis - Administrative Contradiction to Care: Did the patient or surrogate decision-maker decline consent for blood draw, fluid administration, or antibiotic administration within the 6hrs of severe sepsis?  
 1 - Yes (Phys/APN/PA doc of refusal of blood draw, fluid admin, or ATB)  
 2 - No
- Directives for Comfort Care, Severe Sepsis:  
 Yes - Phys/APN/PA doc of CMD OR palliative care was prior to or within 3 hrs of severe sepsis presentation  
 No - Phys/APN/PA doc of CMD or palliative care was not prior to or within 3 hrs of severe sepsis presentation / Not doc / UTD  
 Antral Time: \_\_\_\_\_  
 Sepsis Alert called?  Yes  No  N/A Time: \_\_\_\_\_  
 Sepsis Criteria met:  ED  Utd \_\_\_\_\_  
 Pt admitted from ED to \_\_\_\_\_ at \_\_\_\_\_  
 Sepsis Orders Used?  Yes  No  N/A
- 3hr Initial Lactate Level Collection: (8hrs prior to or 3 hrs following severe sepsis presentation)  
 Yes  No Date: \_\_\_\_\_ UTD Time: \_\_\_\_\_ UTD
- Initial Lactate Level Result:  
 <= 2, or there is no result in the chart, or UTD the result.  
 > 2 and < 4.0  
 >= 4 or more
- 3hr Broad Spectrum or Other Antibiotic Administration: (abstract 14 doses of ANY ATB given 3hrs prior to or 3hrs following severe sepsis presentation, even P-04hrs)  
 Yes  No  
 ATB Name: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_  
 ATB Name: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_  
 ATB Name: \_\_\_\_\_ Date: \_\_\_\_\_ Time: \_\_\_\_\_
- 3hr Broad Spectrum or Other Antibiotic Administration Selection: (only abstract doses given in the 3hrs AFTER severe sepsis presentation)  
 Yes  No
- 3hr Blood Culture Collection: (48hrs prior to or 3hrs following severe sepsis presentation)  
 Yes  No Date: \_\_\_\_\_ UTD Time: \_\_\_\_\_ UTD
- Doc supporting there was Blood Culture Collection Acceptable Delay?  
 Yes  No
- 3hr Repeat Lactate Level Collection: (within 6hrs of severe sepsis presentation)  
 Yes  No Date: \_\_\_\_\_ UTD Time: \_\_\_\_\_ UTD

1145-OCC252 1/12/17

[Hospital Toolkit for Adult Sepsis Surveillance \(cdc.gov\)](http://hospitaltoolkit.cdc.gov)

[Clinical Data Abstraction Flowsheet – CVA/STROKE \(ohiohospitals.org\)](http://clinicaldataabstractionflowsheet.ohiohospitals.org)

# Identify Gaps in Application of Evidence

- Set performance targets
  - IE: 90% compliance with obtaining lactates in 3 hours
  - 100% screening in triage and nurses shift assessments
- Prioritize area to work on first
  - Focus on screening and the 3 hour bundle first then move to the 6 hour bundle
- Understand “why” there are gaps
  - “Go and See” — Walk the process, talk with front line staff
  - Cause and Effect — Fishbone
- Define action plan
  - Can use IHI Model for Improvement
  - PDSA — tests of change

# Gemba Walk...

**Go See**

**Ask Why**

**Show Respect**

<https://www.lean.org/shook/DisplayObject.cfm?o=1843>

# How to “Go and See”

- Purpose
  - Why are you going on the “walk”?
  - What are you trying to achieve : “why can’t you?”
- Process
  - Are the processes designed to consistently achieve the purpose?
- People
  - Are the people knowledgeable of the purpose and the process and engaged and supportive in success
  - Respect people; Rely on People; Develop people; Challenge People

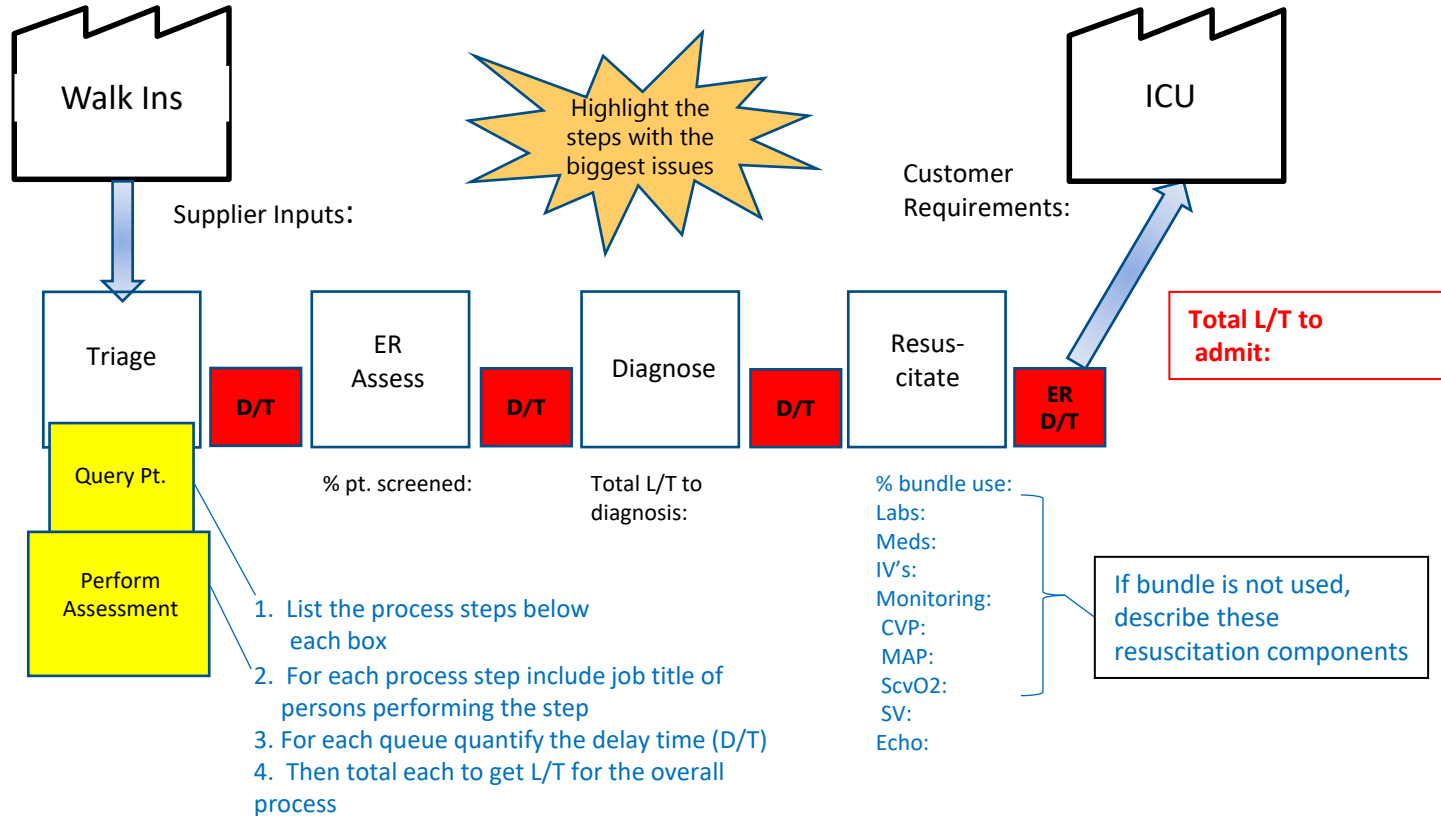

# "Go and See": Let's get started

- Representative colleagues from your department
- Copies of your current state map template
- A proposed "tour" which illustrates the patient flow regarding sepsis care
- "Front line" colleagues who can speak to problems they are seeing and the challenges they are facing

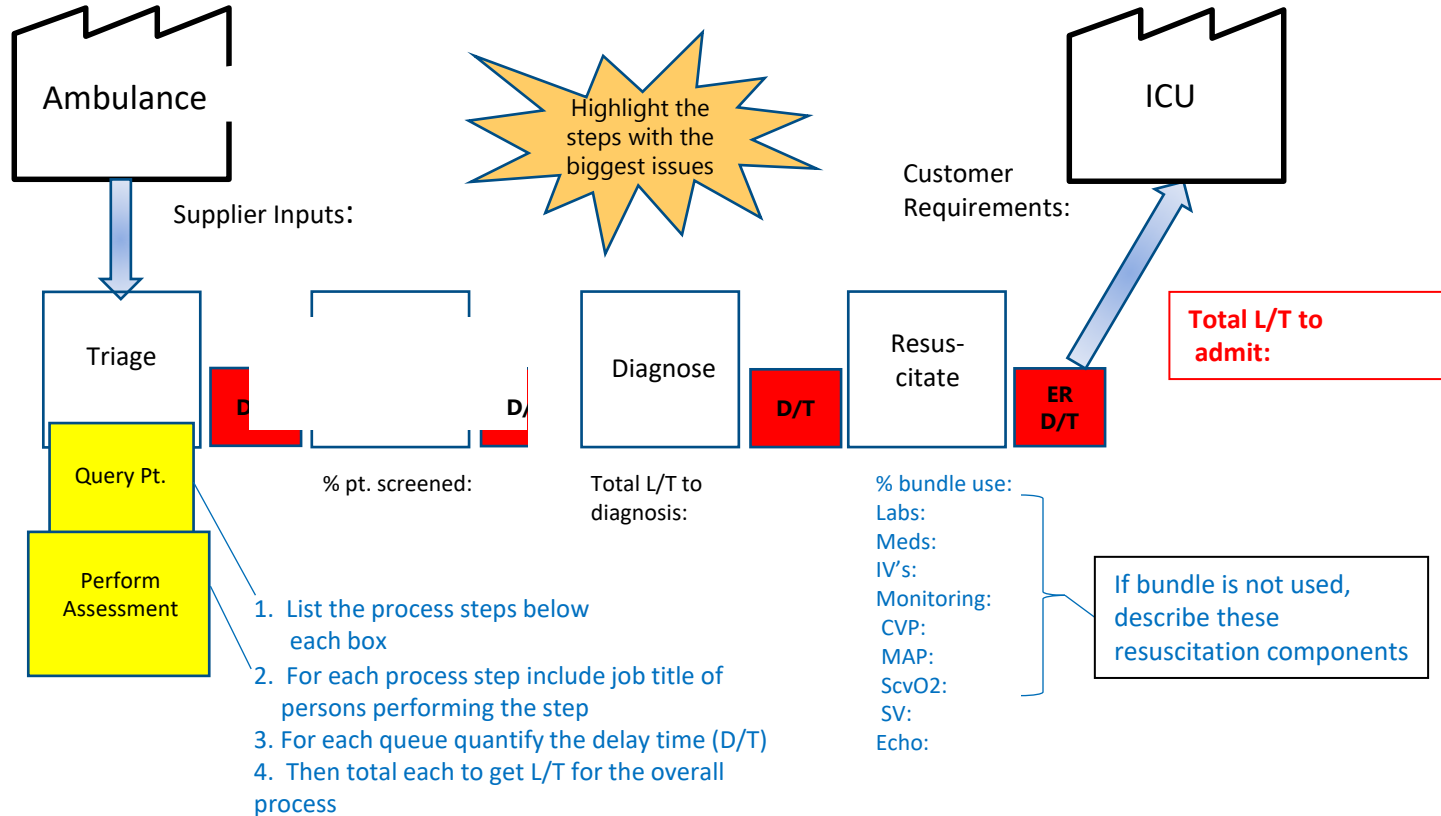

# "Go and See" cont.

- Start at the beginning of the process where patients are introduced to the ED
- Walk the value stream in terms of the patient path for sepsis care
  - Allow the visitors to absorb "what they see"
  - Engage the identified colleagues to tell their view of the "story" of the journey that they are sharing
  - Share any visuals or specific tools/bundles you are using
- Allow the visitors to absorb what they see and hear, take notes.

# Sepsis Patient Flow Template: Walk Ins

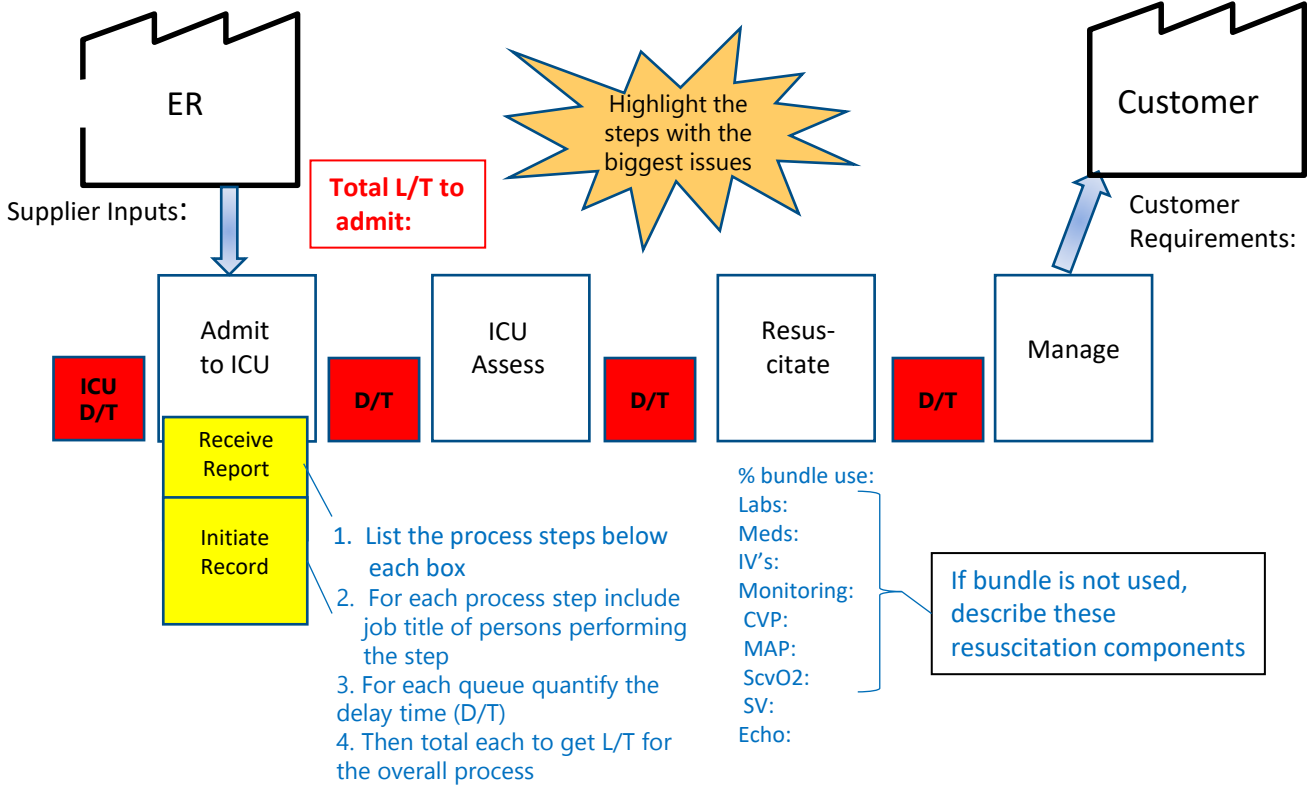

# Sepsis Patient Flow Template: Ambulance

# Sepsis Patient Flow Template: ICU

# Polling Question

How does your hospital audit for compliance with processes like Sepsis mortality reduction?

1. We do not do compliance audits
2. We do retrospective chart audits
3. We do observational audits like a Gemba walk
4. Other: Use chat to share

---

# HQIC Sepsis Data Presentation

# Hospital Data Collection Template

Please enter monthly data for each of the self-reported measures below ↓

DATA ENTRY	Sep-20	Oct-20	Nov-20	Dec-20	Jan-21	Feb-21	Mar-21	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	
Enter the total number of identified sepsis patients with severe sepsis/septic shock, as defined by current CMS core measures:																			
Enter the total number of cases of severe sepsis and septic shock for whom all elements of the 3-hour sepsis bundle were completed on time:																			

Please provide data for one of the four Sepsis Process Measures from the 3-hour bundle. **Note:** You can choose to provide data for more than one measure.

DATA ENTRY	Sep-20	Oct-20	Nov-20	Dec-20	Jan-21	Feb-21	Mar-21	Apr-21	May-21	Jun-21	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	
1) Enter the total number of identified sepsis patients for whom a lactate level is measured within 3 hours:																			
2) Enter the total number of identified sepsis patients who were administered a broad spectrum or other antibiotics:																			
3) Enter the total number of identified sepsis patients who had blood cultures drawn prior to antibiotic administration:																			
4a) Enter the total number of identified sepsis patients for whom an initial lactate level was elevated:																			
4b) Enter the total number of identified sepsis patients for whom an initial lactate level was elevated and a second lactate was completed within 6 hours:																			

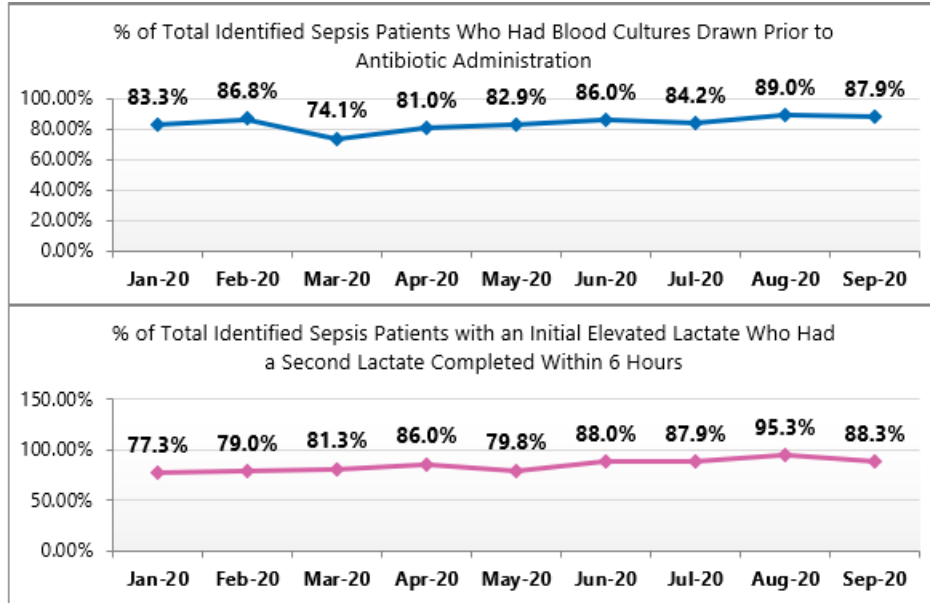

# Hospital Self-Reported Measures

	Jan-20	Feb-20	Mar-20	Apr-20	May-20	Jun-20	Jul-20	Aug-20	Sep-20
<b>Blood Culture Rate</b>	83.3%	86.8%	74.1%	81.0%	82.9%	86.0%	84.2%	89.0%	87.9%
<b>Broad Spectrum Antibiotics Rate</b>	86.8%	90.8%	79.8%	80.4%	86.6%	93.0%	87.7%	89.8%	90.5%
<b>Lactate Measure Rate</b>	84.8%	80.8%	78.2%	92.3%	89.3%	89.8%	87.7%	92.9%	92.2%
<b>Second Lactate Completion Rate</b>	77.3%	79.0%	81.3%	86.0%	79.8%	88.0%	87.9%	95.3%	88.3%

**% of Total Sepsis Patients Completing 3-Hr Sepsis Bundle by Process Measure**

# Self-Reported Data Analysis

# PSI-13: Postoperative Sepsis Rate

## Measure Description

Postoperative sepsis cases (secondary diagnosis) per 1,000 elective surgical discharges for patients ages 18 years and older. Excludes cases with a principal diagnosis of sepsis, cases with a secondary diagnosis of sepsis present on admission, cases with a principal diagnosis of infection, cases with a secondary diagnosis of infection present on admission, and obstetric cases.

## Numerator

Discharges, among cases meeting the inclusion and exclusion rules for the denominator, with any secondary ICD-10-CM diagnosis code for sepsis.

## Denominator

Elective surgical discharges for patients ages 18 years and older with any listed ICD-10-PCS procedure code for an operating room procedure. Elective surgical discharges are defined by specific MS-DRG codes with admission type recorded as elective (SID ATYPE=3).

# PSI-13 Denominator Exclusions

Excludes cases:

- with a principal ICD-10-CM diagnosis code (or secondary diagnosis present on admission) for sepsis
- with a principal ICD-10-CM diagnosis code (or secondary diagnosis present on admission) for infection
- MDC 14 (pregnancy, childbirth, and puerperium)
- MDC 15 (newborns and other neonates with conditions originating in perinatal period)
- with an ungroupable DRG (DRG=999)
- with missing gender, age, quarter, year, or principal diagnosis

# PSI-13 Sepsis Diagnosis Codes

## *Sepsis diagnosis codes for PSI 13/PDI 10: (SEPTI2D)*

A021	Salmonella Sepsis	A4150	Gram-Negative Sepsis, Unspecified
A227	Anthrax Sepsis	A4151	Sepsis due to Escherichia coli [E. coli]
A267	Erysipelothrix Sepsis	A4152	Sepsis due to pseudomonas
A327	Listerial Sepsis	A4153	Sepsis due to serratia
A400	Sepsis due to streptococcus, group A	A4159	Other gram-negative Sepsis
A401	Sepsis due to streptococcus, group B	A4181	Sepsis due to enterococcus
A403	Sepsis due to streptococcus pneumoniae	A4189	Other specified Sepsis
A408	Other streptococcal Sepsis	A419	Sepsis, Unspecified organism
A409	Streptococcal Sepsis, Unspecified	A427	Actinomycotic Sepsis
A4101	Sepsis due to methicillin susceptible staphylococcus aureus	A5486	Gonococcal Sepsis
A4102	Sepsis due to methicillin resistant staphylococcus aureus	B377	Candidal Sepsis
A411	Sepsis due to Other specified staphylococcus	R6520	Severe Sepsis without septic shock
A412	Sepsis due to Unspecified staphylococcus	R6521	Severe Sepsis with septic shock
A413	Sepsis due to hemophilus influenzae	T8112XA	Postprocedural septic shock, initial encounter
A414	Sepsis due to anaerobes	T8144XA	Sepsis following a procedure, initial encounter

# Medicare FFS Claim Analysis

## EXAMPLE Patient-Level Drill Down

- Inpatient claim (type 60) from **2/1/2021 – 2/19/2021** (LOS: 18 days) at ABC Hospital
  - Elective admission
- DRG Code: **163** – Major chest procedures with major complication or comorbidity (MCC)

### Charged Procedure Codes (Denominator Flag)

- 0W9930Z – Drainage of Right Pleural Cavity with Drainage Device, Percutaneous Approach
- **0BNF0ZZ** – Release Right Lower Lung Lobe, Open Approach
- **0BND0ZZ** – Release Right Middle Lung Lobe, Open Approach
- **3E0L4GC** – Introduction of Other Therapeutic Substance into Pleural Cavity, Percutaneous Endoscopic Approach
- 04HY32Z – Insertion of Monitoring Device into Lower Artery, Percutaneous Approach
- 3E0L3GC – Introduction of Other Therapeutic Substance into Pleural Cavity, Percutaneous Approach
- 0W990ZZ – Drainage of Right Pleural Cavity, Open Approach
- BB24ZZZ – Computerized Tomography (CT Scan) of Bilateral Lungs

### Charged Diagnosis Codes (top 10) (Numerator Flag)

Principal Diagnosis:

- J90 (POA) – Pleural effusion, not elsewhere classified

Secondary Diagnoses:

- **A419** – Sepsis, unspecified organism
- **R6521** – Severe sepsis with septic shock
- N170 (POA) – Acute kidney failure with tubular necrosis
- E872 (POA) – Acidosis
- I130 (POA) – Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease
- I5022 (POA) – Chronic systolic (congestive) heart failure
- E870 – Hyperosmolality and hypernatremia
- N1830 (POA) – Chronic kidney disease, stage 3 unspecified
- E039 (POA) – Hypothyroidism, unspecified

# PSI-13: Postoperative Sepsis Rate

## HQIC Network Performance

# 30-Day Sepsis Mortality (%)

## Measure Description

Percentage of beneficiaries admitted with a primary OR secondary diagnosis of sepsis – including those with sepsis present on admission (POA) – who died within 30 days of diagnosis.

## Numerator

Number of beneficiaries who died within 30 days of being diagnosed with sepsis.

## Denominator

Number of beneficiaries who were admitted with a primary OR secondary diagnosis of sepsis, including sepsis present on admission (POA).

# Medicare FFS Claim Analysis

## EXAMPLE Patient-Level Drill Down

- Inpatient claim (type 60) from **5/19/2021 – 5/25/2021** (LOS: 6 days) at ABC Hospital
- DRG Code: **871** – Septicemia or severe sepsis without mechanical ventilation (MV) >96 hours with major complication or comorbidity (MCC)

### Charged Diagnosis Codes (top 10) (Denominator Flag)

Principal Diagnosis:

- **A419 (POA)** – Sepsis, unspecified organism

Secondary Diagnoses:

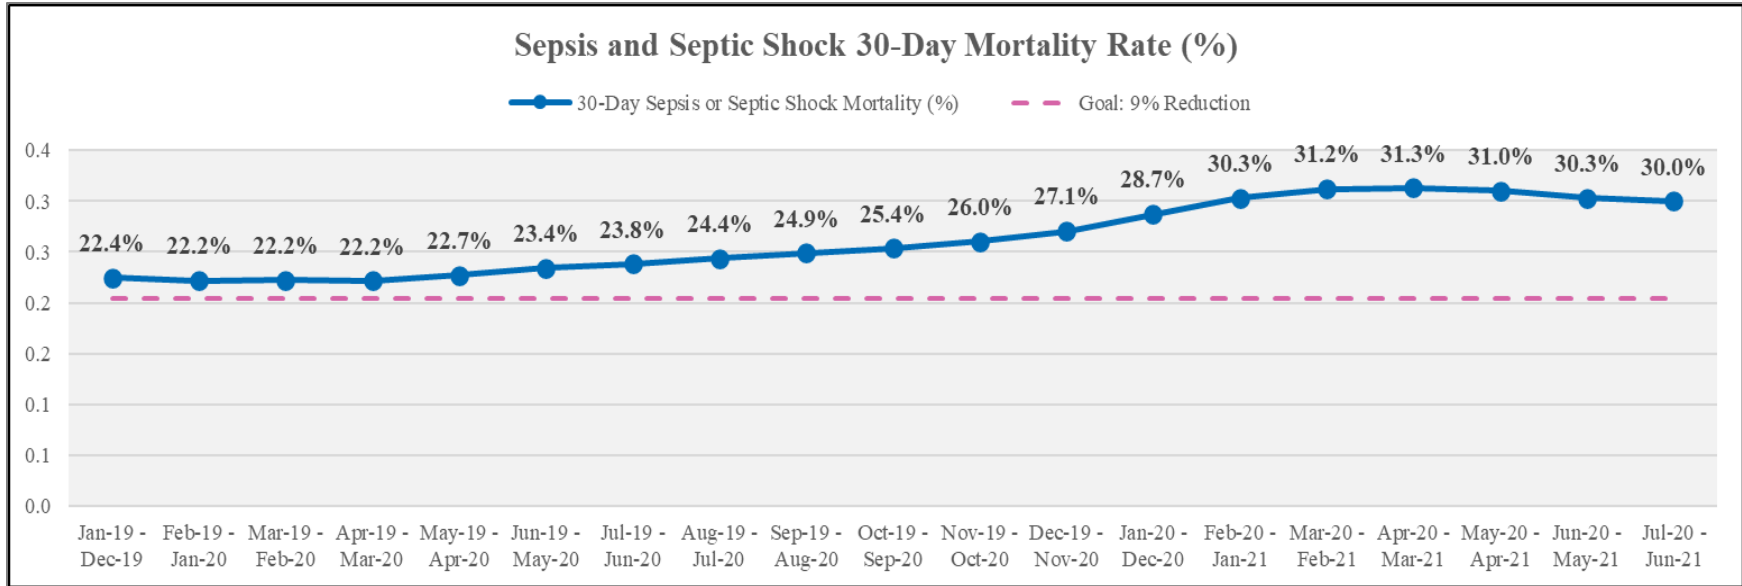

- G9341 (POA) – Metabolic encephalopathy
- N179 (POA) – Acute kidney failure, unspecified
- N390 (POA) – Urinary tract infection, site not specified
- I429 (POA) – Cardiomyopathy, unspecified
- A0472 (POA) – Enterocolitis due to Clostridium difficile, not specified as recurrent
- N184 (POA) – Chronic kidney disease, stage 4 (severe)
- **R6520 (POA)** – Severe Sepsis without septic shock
- G4733 (POA) –
- Z853 – Personal history of malignant neoplasm of breast

### Numerator Flag

- Beneficiary admitted on **5/19/2021**
- Diagnosed with **A419** – Sepsis, unspecified organism as present on admission (**POA**)
- Beneficiary passed away on **6/11/2021**
  - **23 days** after diagnosis (< 30 days)

# 30-Day Sepsis Mortality (%)

## HQIC Network Performance

# HQIC Measure Comparison

# Sepsis Mortality and COVID-19

**37% Increase in Mortality** among all sepsis admissions

**16% Increase in Mortality** among patients without a comorbid COVID-19 diagnosis

# Where is the Challenge?

## **With evidence of compliance with the 3hr bundle completion why is mortality not changing?**

- Many HQIC hospitals report that they are meeting the Sep1 bundle elements
- The HQIC Network mortality rate is 30.0%
- Most hospitals are NOT meeting the HQIC goal for the Sepsis mortality measures

# Determining the Gaps: Understanding Why

- Success relies on a complex set of tasks being completed in a limited amount of time
- Requires data collection and analysis to determine the bottleneck(s)
- Must analyze the workflow for patients arriving in the ED as well as those who become septic after hospitalization
- QI/PI teams are a great resource when available
- Multiple tools have proven successful
- Some examples of diagnostic tools used for analysis, and the “therapeutic” tools developed out of the analysis

---

# Feedback

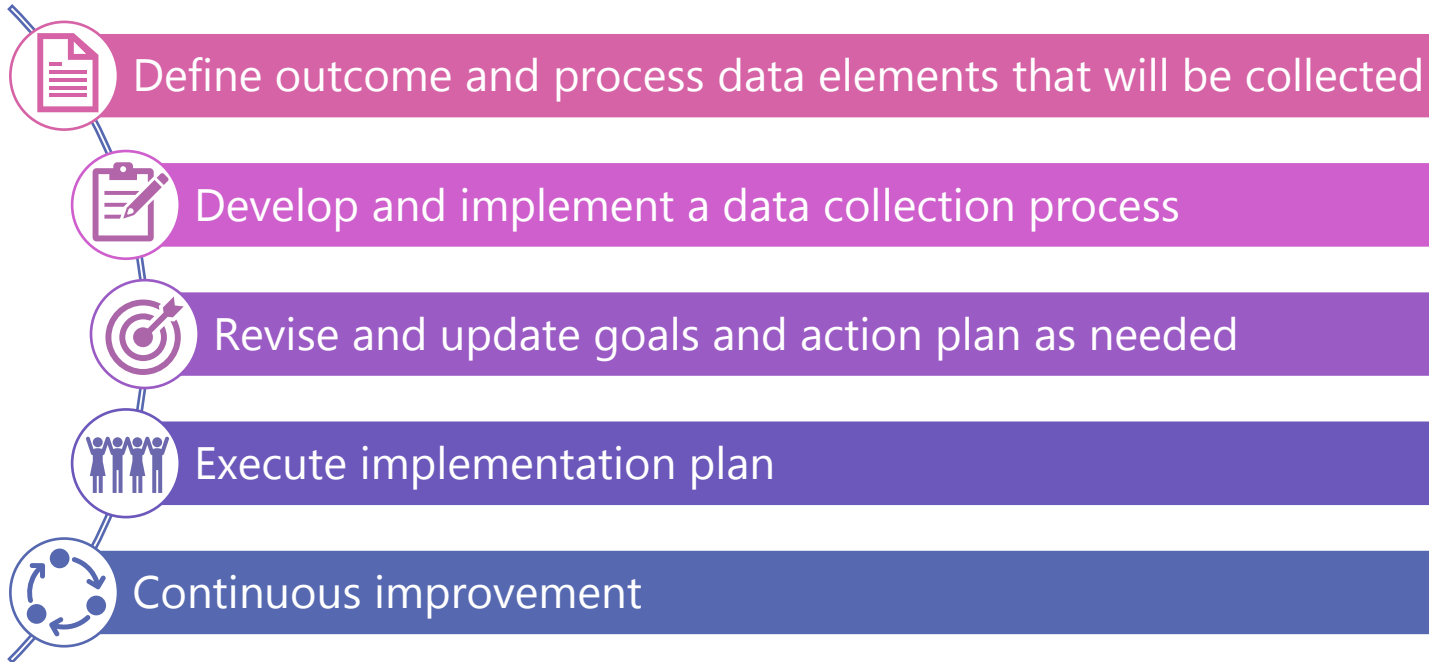

# Sepsis Team: Core Group

- Monthly multidisciplinary sepsis team meeting with consistent attendance
  - Nursing and physician champions
  - Lab, pharmacy, and radiology as needed
  - Accountable executive understands the role, holds team accountable and assists with problem-solving and removing barriers
  - Timely feedback (data) to the team providing care to the sepsis patients

# Sepsis Team: Core Group, cont.

- Set goals/expectations for sepsis program
- Use examples of hospital patients in case studies for education of staff (good outcomes and bad)
- Provider specific data on compliance with bundle elements and patient outcomes, compared to the goal
- Individual case feedback based on case reviews

# Measurement Milestones and Checklist

# Data Collection and Analysis

## Responsible Team Members

- Leadership Team
- QI Team
- Abstractors
- Case Managers

## Frequency

- Daily
- Weekly
- Monthly
- Quarterly
- Annually

## How will you communicate data

- Board Meetings
- Bulletin Boards
- Dashboards
- Newsletters
- Posters
- QI Meetings
- Staff Meetings
- IDT Rounds
- Others

## Data will be communicated with:

- Board Meetings
- Caregivers
- Community
- Executive Leadership
- Families
- Patients
- Staff
- Volunteers
- Others

# Frequency of Feedback and Communications

- Daily
- Weekly
- Monthly
- Quarterly
- Annually

# Is a Report Card Needed?

	2019 Goals	2018 Results
<b>SEPSIS POPULATION</b>		
Patients admitted meeting Sepsis criteria		
Patients admitted meeting Septic Shock criteria		
Total Sepsis patient Population		
<b>PERFORMANCE MEASURES</b>		
All or none 3 and 6 hour bundle Including Reperfusion Exam	> 65%	62%
All or none 3 and 6 hour bundle Excluding Reperfusion Exam	> 65%	65%
Order Set Usage	> 80%	2%
Blood cultures before antibiotics	> 95%	95%
Initial lactic acid obtained	> 95%	97%
Broad-Spectrum ATB's Given in < 3 hrs	> 95%	95%
30 ml/kg fluid bolus given in < 3 hrs	> 85%	78%
Repeat lactate level obtained if initial above 2 mmol/L	> 85%	74%
Vasopressor if indicated	100%	84%
Septic Shock Reperfusion Exam	> 85%	51%
Patient Education Documented	> 85%	87%
<b>OUTCOME MEASURES</b>		
<b>Mortality Rates</b>		
Sepsis Mortality Rate	< 15%	2%
Septic Shock Mortality Rate	< 25%	9%
<b>Length of Stay</b>		
Sepsis Average LOS	< 9 days	6.5
Septic Shock Average LOS	< 9 days	9
<b>Readmission Rates</b>		
Non Sepsis readmissions	<10%	17%
Sepsis 30 day readmission	<10%	7%

# Polling Question

How often does your hospital provide feedback to staff and practitioners?

1. Daily
2. Weekly
3. Monthly
4. Annually
5. Never
