

Health Quality Innovation Network

# Partnership to Prevent Sepsis

8/18/2022

# Health Quality Innovation Network

# Logistics – Zoom Meeting

To ask questions, click on the **Chat** icon.

**Raise your hand** if you want to verbally ask a question.

Resources from today's session will be posted in **Chat**.

You may adjust your audio by clicking the caret next to the **Mute** icon.

# Your HQIN Team

**Allison Spangler,**  
BSN, RN, RAC-CT,  
QCP, Quality  
Improvement  
Advisor

**Dana Schmitz,**  
MS, BS, Quality  
Improvement  
Advisor

**Sibyl Goodwin,**  
BSN, RN, DNS-CT,  
Quality Improvement  
Advisor

**Mary Locklin,**  
MSN, RN, CIC, Senior  
Quality Improvement  
Advisor-Infection  
Prevention

**Cindy Warriner,**  
BS, RPh, CDCES,  
Senior Consultant  
Pharmacist

# Agenda

**1**

**Discuss the Impact of Sepsis**

**2**

**Introduce Partnership to Prevent Sepsis**

**3**

**Quality Improvement Process**

**4**

**Building Your Team**

**5**

**Next Steps**

# Sepsis Details

- Sepsis is a leading cause for hospital readmissions
  - 1 in 5 patients is readmitted within 30 days of a hospital sepsis discharge
- Readmission patients have had a longer hospital stay
- Costs for sepsis readmissions is higher than other diagnoses

Source: Cleveland Clinic Consult QD

# Sepsis Impacts Payment: Quality Measures, 5-Star Ranking & More

- Re-hospitalizations after a nursing home admission
  - Short stay admissions to your facility that are readmitted to an acute hospital within 30 days
- Emergency department visit within 30 days of admission
  - Short stay admissions that go to an acute hospital ED within 30 days of admission
- Long-stay measures that potentially relate to sepsis
  - Number of hospitalizations and emergency department visits
  - Percentage of UTIs
- Medicare Spending Per Beneficiary (MSPB) – HVBP, SNF-QRP
- Bundled payments, ACOs, shared savings

# Goals of Partnership to Prevent Sepsis

1. Create a culture to prevent sepsis through leadership commitment
2. Implement infection prevention strategies such as hand hygiene, vaccinations and antibiotic stewardship that reduce infections that lead to sepsis
3. Improve processes for identifying and treating infections
4. Implement/improve processes for early recognition of sepsis
5. Implement/improve processes for treatment of residents with early sepsis
6. Engage and educate families and caregivers who can help identify the early signs of infection/sepsis
7. Establish/enhance partnerships and collaborative relationships with referring hospital(s)

# Our Commitment

- Prepare data reports and facilitate analysis
- Provide consultation by qualified quality improvement professionals and subject matter experts
- Share best practices and evidence-based tools and resources
- Develop and facilitate collaboration
- Provide expertise and practical assistance

# SAMPLE Sepsis Report

## SEPSIS SPRINT SERIES TARGETED NURSING HOME SUMMARY

Table 1. Nursing Home Readmit and ED Visit Rates by Rolling 4-Quarter Periods

Rolling 4-Quarter Ending	2020-Q4	2021-Q1	2021-Q2	2021-Q3	2021-Q4
# of Inpatient discharges to NH with principal DX of sepsis	23	17	26	24	24
# of Readmissions from NH following inpatient sepsis discharge	6	5	9	7	8
# of ED visits from NH following inpatient sepsis discharge	2	0	3	5	5
NH Sepsis Readmit Rate	26.1%	29.4%	34.6%	29.2%	33.3%
NH Sepsis ED Visit Rate	8.7%	0.0%	11.5%	20.8%	20.8%

Figure 1. Nursing Home Readmits Within 30 Days of Sepsis Inpatient Discharge

# SAMPLE Sepsis Report, continued

Figure 2. Nursing Home ED Visits Within 30 Days of Sepsis Inpatient Discharge

Figure 3. % of Inpatient discharges to NH with a principal diagnosis of sepsis that had a secondary diagnosis of UTI, Pneumonia, COVID, or CDI

# What Should You Do?

- Build your team
- Complete the Sepsis Gap Analysis
- Establish lines of communication with your referring hospital(s)
- Participate in Partnership to Prevent Sepsis Affinity Groups
- Utilize QAPI process to drive improvement

# Build Your Team

- Sepsis champion
- Administrator
- DON
- IP
- CNA
- Medical director/clinician
- Resident/family representative

# Nursing Home Sepsis Gap Analysis

- Focus on operation processes and systems
- Pre-admission
- Admission transfer from hospital with sepsis diagnosis

Element	Yes	No	N/A	Unsure	Comments
<b>Early Identification of Sepsis &amp; Infection Risk</b>					
11. Does your admission nursing assessment include an infection and sepsis risk assessment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
12. Do you audit the admission nursing assessment to ensure it is completed?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
13. If infection/sepsis risk is triggered on assessment, do you care plan the level of infection/sepsis risk?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

[The Nursing Home Sepsis Gap Analysis is available for download on hqin.org](http://hqin.org)

# Nursing Home Sepsis Gap Analysis

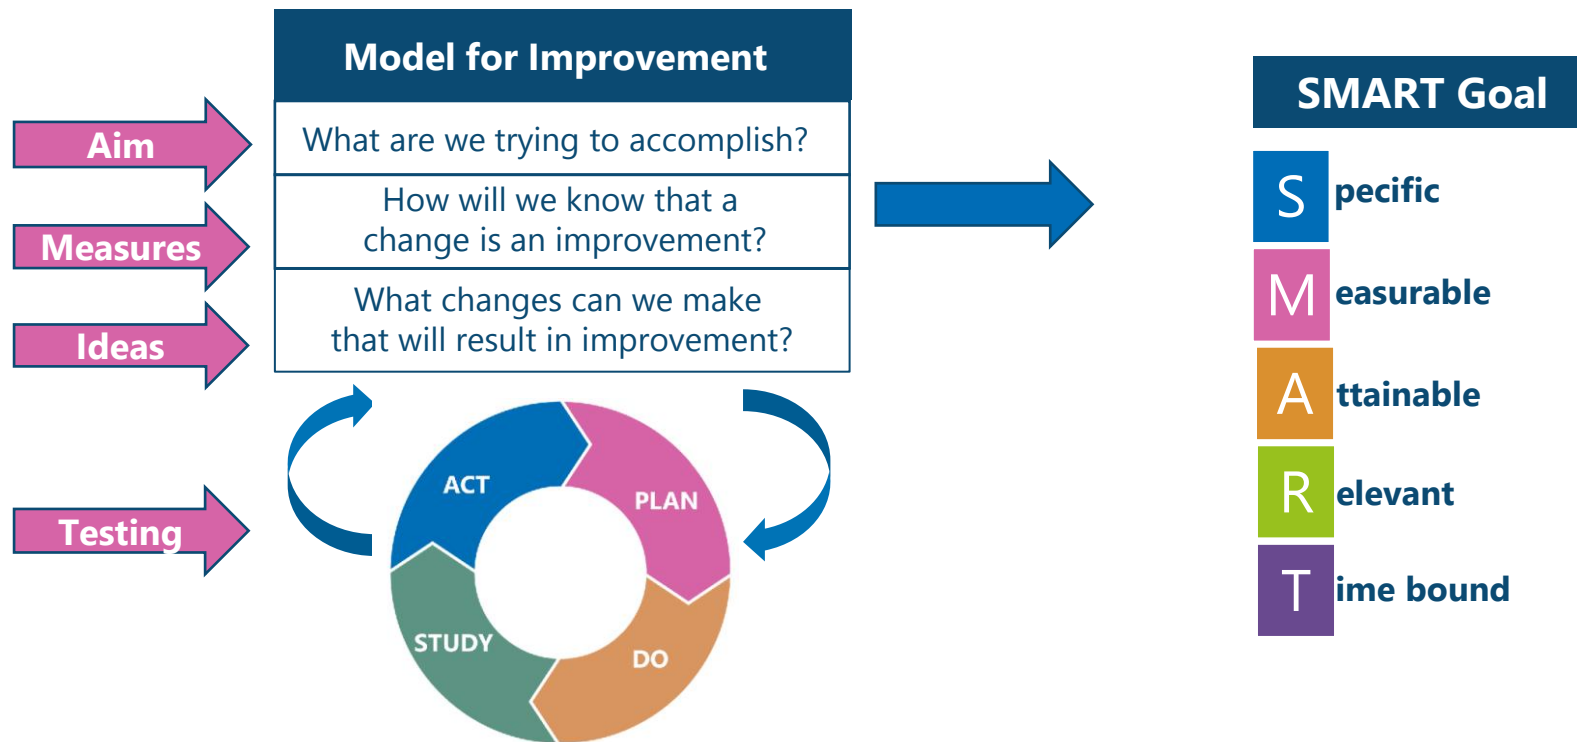

- Focus on improving staff knowledge
- Create a pathway to strengthen sepsis readmission programs

Leadership Support				
1. Do you have a sepsis program? If yes, please describe in comments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Does your sepsis program have leadership support, i.e. administrator, medical director, medical staff, clinical staff?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Is your medical staff actively involved in sepsis prevention?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Education				
7. Do you have a sepsis early recognition training program?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
a. If No, do you need assistance setting up a training program?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Does nursing staff have an annual competency for sepsis?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Do you utilize skills days for nursing assistant sepsis training?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

[The Nursing Home Sepsis Gap Analysis is available for download on hqin.org](http://hqin.org)

# QAPI Process

# Five Whys Tool for Root Cause Analysis

- Develop a clear, specific problem statement
- The team facilitator asks why the problem happened and records the team response
- If the answer provided is a contributing factor to the problem, the team keeps asking "Why?" until there is agreement from the team that the root cause has been identified
- It often takes three to five whys, but it can take more than five!

<b>Problem statement</b>	One sentence description of event or problem
<b>Why?</b> ➡	
<b>Why?</b> ➡	
<b>Why?</b> ➡	
<b>Why?</b> ➡	
<b>Why?</b> ➡	
<b>Root Cause(s)</b>	1. 2. 3.  To validate root causes, ask the following: If you removed this root cause, would this event or problem have been prevented?

**Keep going until the team agrees the root cause has been identified**

# Sepsis Action Plan

## Infection Prevention and Control Action Plan Template

Facility Name: \_\_\_\_\_

Date: \_\_\_\_\_

### TOPIC AREA

- |   |  |   |
|---|--|---|
| <input type="checkbox"/> Antibiotic Stewardship | <input type="checkbox"/> Infection Control Surveillance            | <input type="checkbox"/> Vaccination          |
| <input type="checkbox"/> Environmental Hygiene  | <input type="checkbox"/> Staff Infection Exposure Prevention       | <input type="checkbox"/> COVID-19 Stewardship |
| <input type="checkbox"/> Hand Hygiene           | <input type="checkbox"/> Testing/Screening, Cohorting Residents    | <input type="checkbox"/> COVID-19 Response    |
| <input type="checkbox"/> Isolation Precautions  | <input type="checkbox"/> Visitors Restriction Infection Prevention | <input type="checkbox"/> COVID-19 Response    |
- ☒ Sepsis

### Conduct Root Cause Analyses for Each Identified Gap or Opportunity:

- Determine contributing factors, events, system issues and processes involved
- Utilize RCA tools as appropriate (e.g., 5 Whys, Fishbone, Cause & Effect Diagram)
- Conduct a Plan-Do-Study-Act (PDSA) to test intervention, review results and adjust action

### Identify Infection Prevention and Control Gaps & Areas of Opportunity:

- CDC Infection Control Assessment for Long-term Care Facilities
- Review previous survey findings, federal and state regulations and CDC updates for long-term
- Check [CMS Quality Safety & Oversight memos](#)

The sample RCA, actions, interventions, best practices and metrics illustrated here to address identified infection prevention gaps are solely intended as example guidance. Your team should perform an infection prevention gap analysis/risks assessment and develop an action plan to best meet the needs of your specific organization and community.

# Next Steps

- Form a sepsis team
  - Identify a sepsis champion as the point of contact for the partnership
- Complete the Nursing Home Sepsis Gap Analysis
- Share completed analysis by emailing to [LTC@hqin.solutions](mailto:LTC@hqin.solutions)
- Attend next month's Partnership to Prevent Sepsis session
- Reach out to the HQIN team with questions or assistance needs

# Next Session: Early Screening Strategies

Thursday, September 15  
11:30 a.m. CST | 12:30 p.m. EST
