

Who Needs the COVID-19 Vaccine? And Why?

Like flu and pneumonia shots, COVID-19 vaccines protect us from getting seriously ill, being hospitalized and even dying.

The Centers for Disease Control and prevention recommendations are for people 6 months and older to stay up to date with COVID-19 vaccinations. Vaccinations are an important part of protecting yourself from getting seriously ill or dying from COVID-19. They are recommended for most people. Depending on your age and immunity, you may be eligible to get more than one dose.

We care about protecting our residents and our staff.

That's why we encourage everyone who is eligible to get their COVID-19 vaccinations.
