

COVID-19 Vaccine Recommendations *for Adults*

(July 2024)

Get your annual COVID-19 vaccination.

People aged 65 years and older should receive an annual COVID-19 vaccine (i.e., Moderna, Novavax, Pfizer-BioNTech).

Additional doses may be needed based on your health, chronic conditions or immune response.

Please speak to a nurse, medical director, health care provider or pharmacist for guidance on when you are due and the benefits of vaccination.
